Codeine Linctus Syrup

Codeine Linctus is a cough syrup that contains codeine phosphate, it helps to reduce the desire to cough. This medicine will provide relief from irritation caused by a persistent cough.

Codeine Linctus is ideal for those suffering from a dry cough who are looking for an effective treatment. Codeine Linctus is also available in a sugar-free syrup.

How to take it

Codeine linctus is use as an anti-tussive for non-productive (dry) cough in adults. Some brands can also be use in children aged 12 to 18 years but should not be use in those with compromised respiratory function.

The evidence for the effectiveness of codeine linctus in short-term cough is limited, and although they may be effective for chronic cough (lasting over eight weeks), medical assessment is important in this case as it may indicate an underlying condition.

Effects

As an opioid-containing medicine, codeine linctus usage can result in dependence or addiction. Recently, there have also been significant concerns about codeine linctus being use recreationally for its opioid effects. And rather than as a cough suppressant, leading to the risk of overdose.

For example, it is use as an ingredient in the recreational drink 'Purple Drank' (also known as 'Lean', 'Sizzurp' or 'Purple') in varying amounts, meaning that consumers may not be aware of the dose they are taking. Consumption of these products can have serious risks.

This including loss of consciousness, respiratory suppression and death, especially with concomitant use of other CNS depressants such as alcohol or sedatives.

The risk of opioid toxicity is also increase in people who are ultra-rapid metabolisers of codeine, as they convert codeine to morphine faster than others.

Patients will still be able to access codeine linctus with a prescription from a healthcare professional. The MHRA says that healthcare professionals should read the Summary of Product Characteristics for codeine linctus before prescribing, especially in patients with a history of substance abuse.
